Mr. J. T. Morris  
6600 Essex  
Louisville, KY 40216

Dear Mr. Morris:

This letter is in response to your letter dated 11/4/85 which stated a concern related to the Lees Lane Landfill Site.

Comment: "The true depth, what's actually in the landfill are unknown, and furthermore nothing being done to find out. The report sent to us was untrue in many different accounts."

EPA's Response: The depth and characterization of the waste were not part of the RI Study. The estimated depth was used only for FS purposes to evaluate the feasibility of certain alternatives. Also, the health risks associated with drilling through the landfill did not warrant characterization of waste at this time.

Presently, the Agency is in the process of preparing a Responsiveness Summary. This document serves two purposes; (1) to aid EPA in reaching a decision about the most cost-effective remedial alternative at the site and (2) to address citizen concerns and EPA's response to those concerns. Upon completion of the Responsiveness Summary, it will be placed in the information repository.

If you have any questions, please call me at (404) 347-2643.

Sincerely yours,

Reverly Houston  
Remedial Project Manager  
Emergency and Remedial
